Illustrative geometry only: joint +40 mm; hand offset +60 mm; dotted levels = 24/28/32 cm
a Grip trajectory (cross = mechanical axis)
A/B share the same grip path
World Z (cm)
World X (cm)
b Contact-point proxy, not forearm length
Pad-contact to grip (cm)
Downstroke angle (deg)
c Fixed world hand offset
Elbow-joint to wrist (cm)
Downstroke angle (deg)
d Hand offset rotates with mechanism
Elbow-joint to wrist (cm)
Downstroke angle (deg)
A Current
B Pad shift
C Elbow-axis
D Offset-axis
